Delivery Process

ABOUT ONE KEY ACCESS

One Key Access unlocks frictionless 24/7 deliveries by providing couriers with an easy and secure way to access buildings and delivery lockers.

Powered by the One Key Access cloud platform, delivery drivers are provided with a universal digital credential that grants secure entry to connected buildings and delivery lockers on their delivery route, during delivery times.

Failed deliveries and drivers waiting for residents are a thing of the past with One Key Access.

One Key Access is trusted by:

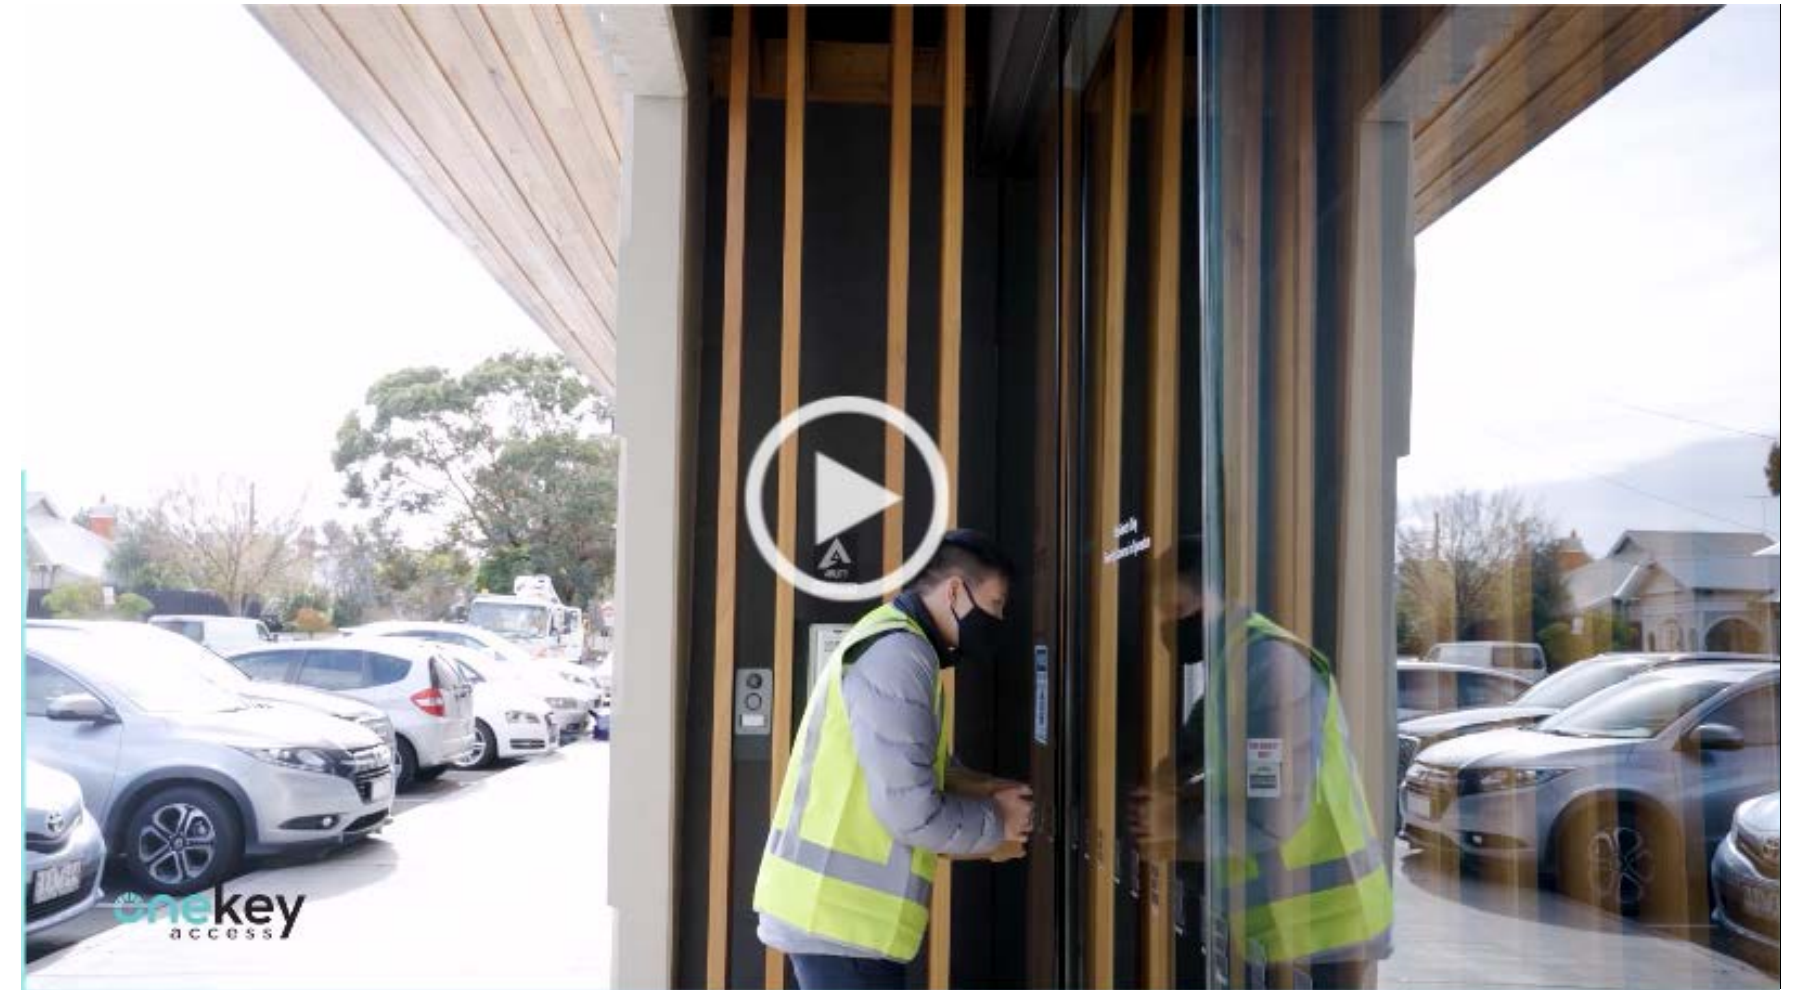

and more...

HOW IT WORKS

Delivery drivers are assigned a One Key Access universal digital credential and mapped to buildings and parcel lockers on their delivery route.

Delivery drivers now gain immediate access whenever they are delivering a connected location by presenting their One Key Access pass.

CLICK N COLLECT LOCKER FLOW

Couriers can scan a barcode on 'welcome' screen to authenticate and log in. This functionality will work for whichever configuration the 'welcome' screen is set to.

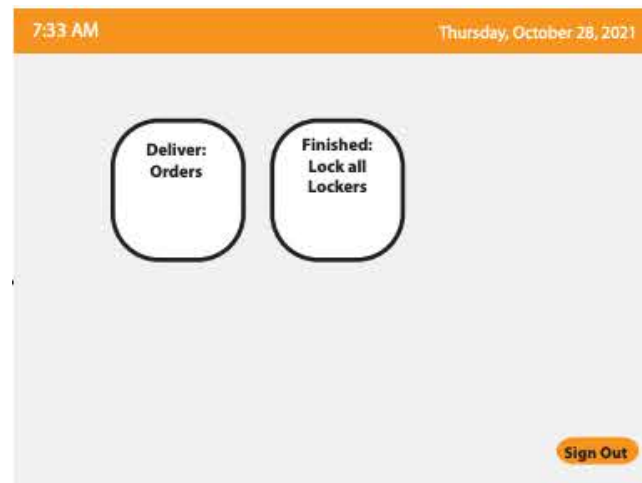

If courier selects "courier" button, they are taken to authentication screen

Here the courier can log in with their integrated partner ID or their CNC system generated user PIN.

This can be entered via scanning barcode/QR or manually via the on screen keyboard.

Note, the driver will scan the QR code on their One Key Access fob to automatically sign-in to the locker

Driver will select "deliver order"

Driver will type in resident name and select from list
